

ADTA 5900/5560: Important Notes

Class Assignments: HOWTO Submit

1. Overview

For **each class assignment**, the instructor **discusses** in detail **when** and **how** the assignment is **required to submit**.

As found, the Canvas calendar is not always reliable, and sometimes, even causing confusion and providing incorrect information. Therefore, the instructor does not post any information related to the due date and time of any class assignment using the Canvas calendar.

2. Due Dates and Time of Class Assignments

For **every class assignment**, the instructor discusses in detail **when it is due** and **how it is submitted** in the **last section** of the assignment document.

The student should **review this section carefully** to be sure that he/she can **submit** the assignment **by the due date and time** as required.

If there is any change of the due date and time of any assignment, the instructor will send an announcement to the class about it. Otherwise, it is **expected** that the student should **submit** the assignment **by the due date and time** specified in the **last section** of its document.
